

Agrippa acoustic door holder

The **Agrippa fire door holder** is a wire-free door retainer that uses 'listen and learn' technology to learn the sound of your fire alarm. The device automatically releases the door when the fire alarm sounds preventing the spread of fire.

How does it work?

1

The Agrippa door holder is battery powered and wire-free. The device is installed at the top of the door.

2

Using 'listen and learn' technology, the device learns the sound of the building's fire alarm.

3

The Agrippa door holder recognises the fire alarm and automatically releases the door, protecting the building.

Features and benefits

- Eases access and improves ventilation
- Reduces false activations through 'listen and learn' technology
- Battery powered and wire-free
- Quick installation time
- Hygienically and discreetly installed at the top of the door
- No floor damage or door warping
- LCD display for timed release setting and battery level information
- 12 month warranty

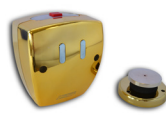

Technical specification

- Battery operated (includes two C-cell batteries)
- L-118mm x W-102mm x D-66mm
- 200N holding force
- Conforms to EN1155 and EN1154
- CE marked through the Construction Products Regulation
- EMC approved
- Digital display
